IntelliSpace Perinatal (ISP) System Admin Workshop

Patient Monitoring | **Classroom - Virtual**

Synopsis
Empower your team to provide front line support to this critical Information system. Learn how to access the system management console, perform basic system administration tasks, and troubleshooting activities.

This workshop will be delivered by a Philips Intellispace Perinatal Subject matter expert.

This virtual session is designed to be interactive and provides an opportunity to ask questions and learn how to support your hospital system.

Class capacity
The course supports a limited number of participants. Attendance is on a first come-first serve basis.
