IntelliVue Support Tool Refresher Workshop

Patient Monitoring | **Classroom - Virtual**

Synopsis

At Philips we recognize that Cyber-security attacks are the number one hazard for healthcare institutions in 2022. With this knowledge we are adapting and evolving the IntelliVue patient monitoring platform to meet the growing demands of our customers and their patients. To keep pace with the evolving landscape, the IntelliVue Support Tool is being updated with new features and capabilities.

Make sure you are ahead of the game by attending our Philips IntelliVue Support Tool refresher workshop.

During this 4-hour workshop you will cover 3 modules;

1. Introduction and Intellivue Support tool review
2. Updates and features
3. Challenges and Gotcha's

Target Audience

- Biomedical Engineers
- Technicians

Course Details

- Duration: 4 hours
- Virtual: A link will be shared with you closer to the date
- Cost: AUD $495.00 pp (excl GST)

Speaker   **Paul Groot Obbink**

Paul is our lead technical training specialist. With a long and extensive career in medical engineering he offers comprehensive trainings that tackle real-world system complications.

In Paul's 20 years with Philips, he has trained biomedical engineers and technicians from all over Australia and New Zealand in patient monitoring systems support.

He strives to empower his students to reach their full potential and excel their careers. He ensures that every training is interactive, fresh and catered to the students needs.

Course highlights

Delivered by our factory accredited Australian based technical trainers, this virtual event will enable certified personnel[1] to update and enrich their knowledge of the IntelliVue Support Tool, including the most recent cyber-security enhancements to hit the IntelliVue platform. Attendance to this course will provide access to the latest version of IntelliVue Support Tool and access to the Philips InCentre documentation repository for 12 months.

What will you get?

- Certificate of attendance
- 1 year access to Incentre

[1]*Workshop is for certified personnel only. Participants must have completed a Philips technical training course in the past 5 years or have an active Support Tool Account. To find out if you qualify, please register your interest to paul.groot.obbink@philips.com. If you have not previously completed a Philips Hospital Patient Monitoring Technical Training course, then please contact paul.groot.obbink@philips.com to register your interest in attending one of our comprehensive technical training course.*
